The current scenario gives rise to a necessity of a single platform of accommodation facilities. It is very difficult to access all accommodation facilities individually. This website can act as an interface between the owners and the users. In this project, we are going to develop an online website which aims at providing accommodation facilities for people. The facilities available are hostels, mess and rooms/flats. Any person can view the details of the facilities but will not be able to give feedback like comments or ratings unless he is a registered user thus disallowing false defamation of any facility. He/She can contact the owner directly with the contact details. To avoid defamatory publicity, only the registered users can add comments.

Keywords :- Intermediate, Defamation

I. INTRODUCTION

It has been a trend for the last few years for Students to shift from their home city to the cities having an educational hub, incubation centers, Market Cities for higher education, Or Job Application. Shifting from one place to another in a new city or town makes it difficult at the beginning if there is no resident place in the destination. The Main issue after Entering into a new city/town is accommodation. People having a lack of contacts in the city have to roam searching for Rooms, Flats, PG, Hostels for Shelters and Messes, Hotels, etc. in the city. Though they select a place to

live, they hardly have any idea about the surrounding of that place.

Business and financial transactions can now be done easily and securely with websites and applications anywhere and anytime. This is a website for people who move to a new city and are proposed with the daunting task of finding shelter and food for their daily life. Upon registering, the user can view hostels, mess, and rooms/flats according to his desired area. The admin will be able to edit, add or remove any advertisement he posts on this website.
